Unique Four Editions Let Reader Pick The Coverage He Needs

Today's complex oil and gas industry activities are performed by two distinct groups: First . . . by specialists who are engaged in only one of the industry's three basic divisions. Second . . . by Management whose duties span more than one of the three basic divisions.

The Petroleum Engineer Publishing Company's unique Four Editions Publishing Plan recognizes that only the individual knows the scope of his interest. From a choice of these Four Editions, the specialist or the man in management can select the Edition edited expressly for him.
